Exercise 6.2: Mapping Uses of the Coastal and Marine Environment

**Objective:** to identify specific uses in each management area as a baseline for identifying areas of potential conflicts and compatibilities.

**Activity:** 1) With your small team, use your map and from the information provided on the map (spatial data plus human use data guide), make some assumptions on where different use activities might take place. Indicate the location of these uses by creating a key with symbols, and drawing those symbols on the map itself.

**Time:** 45 min
